MANUFACTURER PROFILE

Built for buyer evaluation

YOUNUO IET is a Shenzhen-based smart lock manufacturer founded in 2011. The company supports product development, manufacturing and project evaluation for international brand owners, distributors and project teams.

2011

FOUNDED

Shenzhen

MANUFACTURING BASE

3

CORE PRODUCT PLATFORMS

YOUNUO IET SHOWROOM

01

Product and engineering coordination

Requirements can be reviewed across industrial design, structure, electronics, firmware and supported platform integration.

02

Sampling and validation

Prototype scope, interface and function checks, and project-specific validation requirements are aligned before production.

03

Manufacturing and delivery support

Production planning, quality checkpoints, packing and handoff documentation are reviewed for the approved project scope.

CORE PRODUCT SCOPE

Three platforms for international B2B sourcing

Product and system scope is reviewed against the target market, project workflow and buyer-defined requirements.

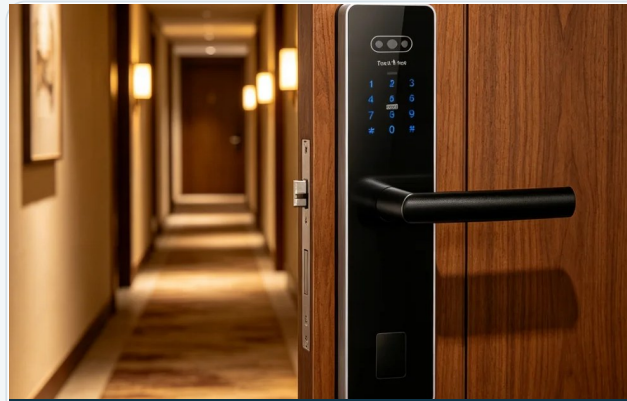

01

Home Smart Locks

Residential smart lock platforms for private-label and project programs. Model selection can be reviewed against access method, door and lock-body compatibility, and target-market requirements.

RESIDENTIAL PROGRAMS

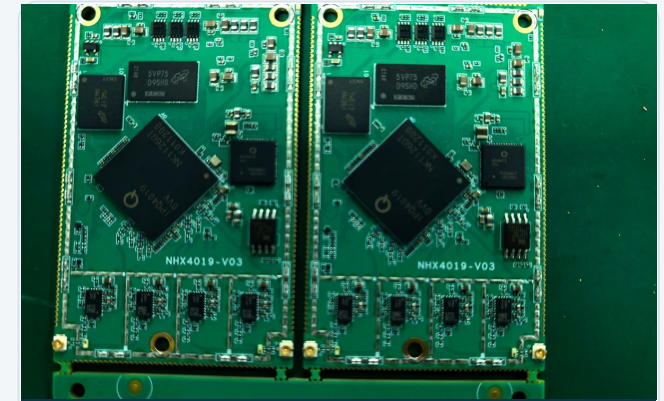

02

Hotel Lock Systems

Hotel lock hardware and management-system options for hospitality projects. Scope is reviewed around room workflow, access credentials, software requirements and deployment environment.

HOSPITALITY PROJECTS

03

Smart Lock PCBA / SKD

PCBA, electronic modules and assembly-ready kit structures for localized programs. Component scope, test requirements and documentation are defined before quotation.

LOCALIZATION PROGRAMS

DEFINED REVIEW PATH

From requirements to production handoff

Each stage is reviewed against the selected product direction, engineering scope and destination-market requirements.

01

Requirement review

Market, door type, functions, quantity and delivery target

02

Product and engineering evaluation

Platform fit, structure, electronics, firmware and customization scope

03

Sample and validation

Prototype build, interface and function review, agreed validation plan

04

Production and quality review

Approved sample, production readiness and defined checkpoints

05

Delivery and after-sales coordination

Packing, documentation, shipment handoff and issue communication

EVIDENCE BEHIND THE PROCESS

Real manufacturing and verification imagery

Factory review should connect documented scope with the actual production and test environment.

PUBLIC FACTORY IMAGERY

Review the environment behind the product

The following images document YOUNUO IET production, assembly and verification activities. Project-specific checks remain subject to the selected model and agreed requirements.

SMT and PCBA production environment

Smart lock assembly line

PCBA functional verification

Finished-lock testing and inspection

PREPARE FOR EVALUATION

Prepare your smart lock project brief

A structured project brief helps the engineering and commercial teams review product fit, customization scope and the next practical step.

- Target market and buyer type
- Product line or model direction
- Door type, lock body and installation scenario
- Required access methods and app or protocol needs
- Expected quantity, sample plan and timeline
- Branding, finish, packaging and documentation scope

SCOPE NOTE

Project scope, lead time, compliance documentation and commercial terms remain subject to model and market review.
